

## Summary of June 2010 Update

### Revised Maps:

**Mexico, Chiapas, & Quintana Roo:** Revised following re-consultation with CDC Malaria Branch. Risk area revised to border areas in Chiapas & Quintana Roo. Location of Chichen Itza added to Mexico Overview map; route to Chichen Itza indicated on Quintana Roo map.

**Costa Rica:** Added location of Guapiles.

**Thailand:** Added location of Rayong.

**Turkey:** Identified location of Cappadocia Region, added locations of Gallipoli, Troy, Pergamum, Ephesus, Kusadasi, Nevsehir, and Kayseri.

### New Map:

**Lake Atitlan, Guatemala:** Detailed map of the area around Lake Atitlan, Guatemala

### New Reference Materials:

**China Location Index:** Alphabetical listing of the locations and provinces from the China province maps.

**Mexico Location Index:** Alphabetical listing of the locations and states from the Mexico state maps.

**List of Malaria-Free Countries, Dependencies, and Areas of Special Sovereignty:** Alphabetical listing of countries and other entities considered to be malaria free; vCJD-enhanced version identifies vCJD-risk locations that are malaria-free.

**Ports of Call of the Caribbean, Mexico, Central America, and South America:** List of ports of call sorted by country and color-coded for malaria risk. Ports of call considered to be malaria-free but have risk outside of the port city are identified and coded differently from cities with malaria present.

### Revised Reference Materials:

**List of Risk Countries (vCJD-enhanced version):** Added Azores, Canary Islands, the Spanish North African Territories (listed individually), the overseas dependencies of France (listed individually) and Kosovo as vCJD risk locations

**List of Risk Countries (Malaria-only version):** Added statement clarifying meaning of black text

**vCJD Risk Map of the United Kingdom and Europe (vCJD-enhanced version):** Added comments stating that the Azores are considered to be part of Portugal, the Canary Islands and the Spanish North African Territories (listed individually) are considered to be part of Spain, and the overseas dependencies of France (listed individually) are considered to be part of France. Added the location of Kosovo to the map and updated the statement regarding the Republic of Yugoslavia to include Kosovo as one of the countries that comprises the former Republic of Yugoslavia.

**Table of Contents:** Added listings for new materials and added statement to each page cautioning against screening donors from locations listed in the table of contents.

**Technical Notes (Reference Editions only):** Added clarification of the version of the CDC's Interactive Malaria Risk Map used as a secondary reference, both in general and for specific maps. Updated technical notes on Mexico, adding recent statements received from the CDC regarding risk areas in Chiapas and Quintana Roo. Updated technical notes on Swaziland to include the CDC's update to the online Yellow Book correcting the error in the CDC's Yellow Book statement of risk in Swaziland.
